## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments, see pages 6-8, filed 06 February 2006, with respect to claim 1 have been fully considered and are persuasive. The rejection of claim 1 has been withdrawn.

Applicant's arguments, see page 10, lines 1-15, filed 06 February 2006, with respect to claim 18 have been fully considered and are persuasive. The rejection of claim 18 has been withdrawn.

### ***Allowable Subject Matter***

Claims 1-30 allowed.

The following is an examiner's statement of reasons for allowance:

Examiner has found the prior art to be silent as to an integrated optical parametric oscillator particularly characterized by an *integrated* output face configured to reflect the pump beam and idler beam, while partially transmitting the signal beam.

The invention claimed in the present application is advantageous over examples in the prior art at least because the various components of the optical parametric oscillator, including the grating, are fully integrated onto a single slab of nonlinear optical bulk crystal, thus avoiding the need to mechanically tune the mirror and the rendering unnecessary the laborious task of carefully aligning separate components.

Art Unit: 2828

Claims 2-17 and 19-30 are in condition for allowance because they are dependent on allowed parent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
